

TABLET PRESCRIPTION:

Technology surrounds us. To our children, it seems intuitive. Time to upgrade our skills to incorporate technology into our programming for their benefit.

This seminar will explore the therapeutic value that Tablets can bring to school and home and how they can assist our children with cognitive, learning, social, behavioural or motor difficulties towards improved function and performance.

It is designed for teachers, parents and therapists, such as Occupational Therapists, Speech & Language Pathologists and Educational Assistants.

Participants will learn specifically about the iPad (I & II), LeapPad/Inno Tab, and Android/Google tablets. There will be live demonstration of relevant apps. This includes apps related to schedules/ routines, relaxation, social modelling, communication, behaviour tracking, academics, organization, fine motor activities and more!

Participants will take home a technical comparison chart, useful links, apps reference chart by category and a worksheet to be used as part of the assessment process.

Determining Therapeutic Value for Children on the Spectrum, or with Learning Disability, ABI or Fine-Motor Challenges

WILL COVER:

- Determining when incorporating a tablet can be therapeutic for a child
- Choosing the most appropriate Tablet, such as iPad vs. Android.
- Navigating and using a Tablet
- There's an App for That! Exploring applications available to assist in achieving rehabilitation goals and promoting learning.

Presenters:

Tracy Milner

Tracy is an Occupational Therapist. She owns Complex Injury Rehab Inc. and is co-founder of the Community ABI Network [CABIN]. She completed her Master of Clinical Science degree in Occupational Therapy and Honours Bachelor of Arts degree in Kinesiology at The University of Western Ontario. She is experienced in the case management, assessment, and treatment of adults and children with severe or catastrophic injuries, such as acquired brain injury and spinal cord injury, as well as in Life Care Planning. Clinical interests include comprehensive assessment of and intervention for cognition and psychosocial behaviour. She is a member of the OSOT Auto Sector Team and Attendant Care Task Force. She has published in CJOT and OT International on the topic of peer mentorship. She has presented two previous seminars on the therapeutic use of Smartphones.

Rhona Feldt-Stein

Rhona graduated from the University of Western Ontario with a Bachelor of Science in Occupational Therapy. She has devoted her entire career of more than 35 years to the area of paediatrics. Rhona is currently the Director/Owner of York Paediatric Therapy Services, in Richmond Hill, started in 1984 where they provide Occupational, Physical & Speech-Language Therapy and has contracts with private schools to provide these services through the CCAC. Rhona has worked at the Hosp. for Sick Children, Southlake Hospital (Newmarket) and for the York Region District School Board. Rhona holds a Faculty Status position with the University of Toronto, Faculty of Medicine, Dept. of Occupational Science and Occupational Therapy. She is certified in Neurodevelopmental Therapy, Sensory Integration, Brain Gym and is a Level II Reiki Therapist and also has an interest in feeding issues. Rhona also provides paediatric medical/legal assessments for Insurers and lawyers. She is currently in the process of completing her certification to be a Life Care Planner. Rhona has presented on a variety of topics, locally, nationally and internationally and has published a number of articles.

Matthew Milner

Matthew is an IT Specialist and Adaptive Technology Consultant. He has been supporting the CIR team for the past three years and has more than 15 years of experience in IT support. He was previously a Project Manager supporting Microsoft Exchange and Small Business Server for Microsoft corporate clients. He is a Certified Microsoft Systems Engineer, A+ and Project+ certified and holds a certificate in Networking Communications. He has presented two previous seminars on the therapeutic use of Smartphones.
